

PRAKHAR DAS

Flutter Developer · Software Developer (SDE) · Full-Stack Engineer

Boisar, Maharashtra · +91 73872 84269 · prakhardas48@gmail.com · github.com/PrakharDas · prakhardas-portfolio.vercel.app · linkedin.com/in/prakhardas48

PROFESSIONAL SUMMARY

Flutter and full-stack developer with production experience across fintech, IoT, and AI — shipping 3 concurrent products during a single internship, from ESP32 sensor pipelines to React dashboards and Flutter mobile UIs. Delivered end-to-end features across Electron.js, React Native, and Flask within agile sprint cycles.

TECHNICAL SKILLS

Mobile	Flutter (Provider / Riverpod), React Native — Android & cross-platform UI, state management, responsive design
Frontend	ReactJS, HTML5, CSS3 — responsive UI design, cross-device compatibility, component architecture, data visualisation, responsive layouts
Backend	Node.js, Express.js, Flask — REST API design, server-side logic, third-party integration
Databases	Firebase Realtime DB, MongoDB, PostgreSQL — real-time sync, schema design, queries
Languages	Dart, JavaScript, TypeScript (familiar), Python, Java, C++
Tools	Git, GitHub, Vercel, Render, Netlify, Postman — CI/CD pipelines (basic), agile workflows, API testing, debugging, basic unit testing
Familiar with	TensorFlow, OpenAI API, Docker, OpenCV, YOLOv7, Electron.js

WORK EXPERIENCE

Software Development Intern — Arthasva (FinTech Startup)

Jun 2025 – Sep 2025 · Remote

React · React Native · Electron.js · Node.js · Agile

- Architected a 3-module Transport Management System in Electron.js (quotation, lorry receipt, invoice tracking) — eliminated manual logistics paperwork for the operations team, reducing processing time.
- Shipped funnel management, lead tracking, and KPI dashboard on LeadGen (React.js) — consolidating the full sales pipeline into a single interface used daily by the sales team.
- Built 5+ UI components for Nivesh (React Native fintech app) — investment tracking screens and financial data visualisation flows serving active retail investors.
- Delivered across 3 products in parallel within agile sprint cycles, contributing to code reviews, debugging, and iterative feature releases.

PROJECTS

MedDrip — IoT Saline Monitoring System · ESP32 · Flutter · Firebase

May 2025

- Engineered a full-stack IoT pipeline — ESP32 sensors → Firebase Realtime DB → Flutter mobile app — achieving <2s alert latency for remote saline monitoring and automated flow control across hospital wards.
- Deployed and validated on physical hospital hardware; live Flutter dashboard with real-time data sync, hardware-triggered alerts, and remote-control UI.

Hawkeye — AI Drone Detection System · ReactJS · Flask · YOLOv7 · OpenCV

Nov 2024

- Custom-trained YOLOv7 model served via Flask REST API — achieving 15–25 FPS real-time drone detection across webcam, video, and image inputs using optimised OpenCV pipelines.
- Responsive React.js frontend with live detection overlays, file upload, and result visualisation — end-to-end from model training to deployed web interface; ~85% detection accuracy on test set.

ParkEase — Smart IoT Parking System · ESP32 · Flutter · Firebase

May 2024

- IoT parking system integrating ESP32 sensors, Firebase Realtime DB, and Flutter — live slot tracking (Available / Booked / Occupied) with <1s database sync across 20+ parking slots.
- Dynamic Flutter UI with slot visualisation and booking flow — cross-platform mobile app and full hardware-to-app real-time data pipeline.

EDUCATION

B.Tech — Electronics & Computer Science

Nov 2022 – May 2026

SJCEM, Palghar · CGPA: 8.0 / 10

Coursework: Data Structures, DBMS, OOP, Computer Networks, Embedded Systems

LEADERSHIP & ACTIVITIES

Steering Team Lead & Driver · GKDC & FKDC Student Go-Kart Design Competitions

Oct 2025 & Feb 2026 · Coimbatore

- Served as both Steering System Team Lead and competitive Driver at two national-level go-kart competitions — owned full design, assembly, and resolved live mechanical failures under race pressure.
