

Prakhar Das

Full-Stack Developer | Flutter App Developer | IoT & Real-Time Systems
Boisar, Maharashtra | P: +917387284269 | prakhardas48@gmail.com | github.com/PrakharDas

PROFESSIONAL SUMMARY

Full-Stack and Flutter Developer with internship experience building web, mobile, and IoT applications. Skilled in ReactJS, Flutter, Firebase, Python, and real-time systems with hands-on experience delivering practical products.

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript
Frontend: ReactJS, Flutter, HTML, CSS
Backend: Flask, Firebase, Node.js, Express.js
Databases: MongoDB, PostgreSQL, Firebase Realtime DB
Tools: Git, GitHub, Netlify, Vercel, Render
Familiar: React Native, TensorFlow, OpenAI API

EDUCATION

ST. JOHN COLLEGE OF ENGINEERING AND MANAGEMENT

Bachelor of Technology (B.Tech), Electronics and Computer Science | (8 CGPA)
Relevant Coursework: Data Structures, DBMS, OOP, Computer Networks.

Palghar, Maharashtra
Nov 2022 -2026

Chinmaya Vidyalaya Tarapur

10th & 12th CBSE Board

Boisar, Maharashtra
Apr 2020 - Jun 2022

WORK EXPERIENCE

Arthasva — FinTech & Software Services Startup

Software Development Intern

Remote

Jun 2025 - Sep 2025

- Developed a **Transport Management System** using **Electron.js** with modules for **quotation generation, lorry receipt handling, and invoice tracking** to streamline logistics operations.
- Built and enhanced features for **LeadGen (React-based platform)**, including **funnel management, lead tracking, and KPI dashboards**, improving visibility into sales performance.
- Contributed to **Nivesh (React Native fintech app)** by creating UI components and integrating user-focused features for **investment tracking and financial data visualization**.
- Collaborated in an agile team environment, participated in debugging, feature delivery, and iterative product improvements.

PROJECTS

MedDrip — IoT-Based Intelligent Saline Monitoring System| ESP32, Firebase, Flutter

May 2025

- Built an IoT-based system integrating **ESP32 sensors, Firebase backend, and Flutter mobile app** for real-time saline monitoring
- Implemented **real-time data synchronization and alert system (<1s latency)** for remote tracking and control
- Designed a Flutter app with **live dashboards and automated flow control**, enhancing monitoring efficiency

ParkEase - Smart Car Parking System (IoT) | ESP32, Firebase, Flutter

May 2024

- Developed a parking system integrating **ESP32 hardware, Firebase backend, and Flutter app** for real-time slot tracking
- Implemented **booking system with live status updates (Available/Booked/Occupied)** and instant database synchronization
- Built a Flutter interface with dynamic slot visualization and user interaction, enhancing parking efficiency

Hawkeye – Drone Detection System | ReactJS, Flask, YOLOv7, OpenCV

Nov 2024

- Built a **full-stack AI** system using a custom-trained **YOLOv7** model to perform real-time drone detection on webcam, video, and image inputs
- Achieved **real-time inference (~15–25 FPS)** with optimized OpenCV pipelines for smooth detection performance
- Designed a responsive React interface with **file upload, live detection overlays, and result visualization**, improving usability for surveillance scenarios

ACTIVITIES

GKDC & FKDC — Go-Kart Competitions

Coimbatore, Tamil Nadu

- Driver** for Skid pad and Autocross events
- Head of the Steering Team** and assisted in resolving technical challenges across events

Oct 2025 and Feb 2026
